Product Introduction

Components Introduction

Product Parameters

Product name: kitchen sink

Installation method: Top Mount, Flush Mount, or Under Mount

Main material: Stainless steel

Installation Steps

- 1** Put the template at the proper position on the table and draw the cutting line according to the template.

- 2** Drill a guide hole on the inside of the drawn cutting line, then cut off the opening part of the table along the inside of the cutting line, and decorate the edge.

- 3** Fill glass glue at the cutting position of the table.

- 4** Slowly put the sink close to the front edge, cover it with glue and slowly lay it flat.

- 5** Before putting into the sink, the faucet and soap dispenser can be pre-installed according to the instructions of the faucet and soap dispenser.

- 6** Two installation methods are available for reference.

Installation Steps

- 1** Invert the undermount sink and position it beneath the countertop. Trace the sink edge with a marker, then mark all drill hole locations for the mounting fasteners on the countertop.

- 2** Inject the prepared adhesive evenly into the cleaned holes of the embedded parts, making sure to coat both the hole walls and the bottom.

- 3** Use metal brackets to securely lock the rim of the stainless steel basin beneath the countertop.

- 4** Once curing is complete, gently shake the embedded part to confirm that it is fully secured and not loose.

- 5** Before putting into the sink, the faucet and soap dispenser can be pre-installed according to the instructions of the faucet and soap dispenser.

- 6** The undermount installation method is provided for your reference.

Installation Steps

- 1 After receiving the package, please check that all accessories are complete. Confirm no missing or damaged parts before installation.

Installation Steps

- 2 Correct Installation Diagram: Overflow Hole Installation + Sink Bottom Drain Pipe Structure

Precautions for use

Daily maintenance

- After each use, please clean the smart waterfall sink in time to avoid leaving stains that are difficult to remove.
- Regularly check the surface of the smart waterfall sink for scratches, wear and tear, and replace it in time if necessary.
- Avoid using hard brushes or sandpaper to clean the smart waterfall sink to avoid scratching the surface.
- When cleaning, try to use warm water and avoid using overheated or overcooled water to avoid affecting the service life of the smart waterfall sink.
- When storing dishes, avoid stacking dishes together to avoid scratching the surface.
- Wipe the surface with a soft cloth every week to avoid scratching the material with hard objects such as steel wool. , to prevent dust and stains from adhering.

Precautions

- Avoid pouring hot water (such as boiling water) as it may damage internal components or surface coatings.
- In hard water areas, it is recommended to descale regularly to prevent nozzle clogging (citric acid or special detergents can be used).
- Do not cut food in the smart waterfall sink as this may scratch its surface.
- Do not place acidic or alkaline foods on the dishwashing plate as this may corrode its surface.
- Do not hit the dishwashing plate hard to avoid breaking or damaging it.
- Empty the stored water when not in use for a long time to prevent bacterial growth or odor in the pipes.
- If there is water leakage, abnormal sound or abnormal display, stop using it immediately and contact after-sales.
- Do not disassemble the internal structure by yourself, which may affect the warranty or cause safety hazards.
